Koine Greek Textbook Vol. 1-4. Copyright © 2014, 2015, 2016 by G. Allen Walker, co-editor. All rights reserved. Used only by permission. You may quote or copy up to 10% of this work for use in any 'not for sale' publication or for use in church lessons.

Preface of the Koine Greek Textbook Volume 1-4

This is very much a work in progress. The goal is to have an Open Source Greek series of books that can be purchased for less than \$50 but yet be all that is needed for the serious Bible or Koine Greek Student. In the software world we would call this 'beta.' This would include the Modern Literal Version N.T., an English concordance of it with links to the underlying Greek words from the English words. A Greek Lexicon (Dictionary), a Greek concordance based off of the Byzantine Majority Text and lastly an analytical Greek Lexicon. We would like to also produce a 5th book and attach it later to the Koine Textbook, a Greek Interlinear for Greek Students.

The Koine Greek Textbook Volume 1-4 (with a partial rough alpha version of "The Analytical Greek Lexicon") is also available online within the "Modern Literal Version Dictionary + Greek" an e-Sword module available at: <http://www.biblesupport.com/e-sword-downloads/file/10090-modern-literal-version-2016-greek/> Installation directions are also on that page and the link to the Modern Literal Version N.T. in e-Sword format.

Volume One, the English concordance, contains about 6000 of the English words of the Modern Literal Version N.T. currently up to the 2016 version. Words not listed are: a, an, also, and, be, been, being, had, has, have, having, he, her, him, himself, his, I, is, it, its, me, mine, my, of, our, she, that, the, their, theirs, them, they, to, was, we, were, which, who, whom, you, and your. There are too many to list, or we felt that in a word study, they would be a complete waste of time. Each English word has the reference to the Greek word that underlines that English word when possible.

Volume Two (and Three) is a Greek Lexicon with a Greek Concordance of the Byzantine Majority Text. First, it is a complete replacement for the Strong's Greek Dictionary. Secondly, it was created so anyone, anywhere could check out the work done on the 'Open Source' Modern Literal Version N.T. and help us to create an error-free translation that has been needed for 600 years in English. Thirdly, it was made to give people the ability to do the ultimate word studies.

The Greek Lexicon contained within, is a total revision of the Strong's numbering system to include wording from the minority texts, the majority texts and even wording Strong, himself, omitted by accident from the Textus Receptus; from 5523 up to now 5712 entries. This is the only fix to the etymology of Strong's, (with over 500 corrections), that we know to exist. Considering it was the mid 1800s James Strong, did well, but the work is pitiful by today's knowledge base (we kept the only parts of Strong's worth keeping). Like the MLV as a whole, the MLV Greek Lexicon (part of the New Koine Greek Textbook Volume 1-4) is unique in its concept. Lexicons before this one, looked at how the Greek words were used over the expanse of the language from Classical to Koine Greek (if they even knew Koine was a separate language not discovered until the late 1800's; Strong never knew this fact). (The Public Domain Thayer's is abbreviated, so Christians will not know which definition is Koine.) James Strong also made this same sort of mistake by trying to find more of the etymology of the word and not how it was used in the N.T. Another common idea in lexicons is to see how Koine Greek words were used by Christians. This lexicon used a different approach, it was created at the same time as the MLV and aims to show what is the best English word from our choice of over 550,000 English words to render uniformly the 5401 Greek words of the N.T. This was created by the people who have actually worked on a published Bible translation unlike the other lexicons (Thayer's is debatable).

Volume 4, The Analytical Lexicon, (not finished) is the listings of actual Greek words that are in the two most common Textus Receptus compilations, minority texts and majority texts adapted to Robinson's Morphological Analysis Codes of each word and a very literal translation of each word.

This all needs a good proofreading and we welcome the help! MLVbible (at) gmail (dot) com
This book in electronic form is available in e-Sword format information on the web sites.

The Editors

Notes and Usage

6000+ English words from the Modern Literal Version are listed here. Words not listed are: a, an, also, and, be, been, being, had, has, have, having, he, her, him, himself, his, I, is, it, its, me, mine, my, of, our, she, that, the, their, theirs, them, they, to, was, we, were, which, who, whom, you, your. (Sorry, if we missed any.)

Abbreviations for the Greek Sections:

These abbreviations will take some time to commit to memory, but it is helpful to know them.

G##### (capital G followed by 1-4 numbers) This is the Strong's Greek Reference Number which can be used with Volume 2 and other reference sources available in book form, or via the web.

* (asterisk) is the universal footnoting used in the Modern Literal Version Bible. Words like "for," "**for" and "for*" should be considered as three different English words. There are about 120 such words in the MLV, listed in the Definitions sections of the Modern Literal Version.

* (asterisk) separated from the word, means this English word is ONLY used for one single Greek word.
Example:... for* *, or obey *.

^ means this English word is translated uniformly from related Greek words (a base word and some or all of its compounds).

^^ means the English word is translated uniformly from related Greek words that are related by a common synonym.

~ (tilde) denotes the roughly 200 English words that are not able to be rendered uniformly in the Modern Literal Version. Words that do not have any marks at all also fit into this category. They could also be simply helper words needed to expand meanings and render verb tenses more in line with English syntax.

' or " (single or double quotes) are added with a "^" (caret) and a "~" (tilde) symbol which is easier to explain this way. ^~ means all the words with these symbols are related but the English word is still used for other Greek word(s). ^"~ has exactly the same meaning as the words with the ^'~, but they are not related to them.

----- indicates a rough separation of word groups. (Used in the Lexicon, Koine Greek Textbook Volume II).

A list of these words is in the "Wording Statistics" section in some of the MLV book forms and on the web site:
